Fertilization Protocol

Step 1
Squeeze the Bettix bottle to the right amount of fertilizer desired. Super Concentrate Liquid DynaGro FoliagePro 9-3-6: 5ml to a 10L watering can. Only 1.5 oz per 16 gallons! Contains all the micro nutrients.

Step 2
Connect the Infuser Tube to the Shut-Off Valve of the Watering Machine. NOTE: Make sure the Shut-Off Valve is in the OFF Position.

Step 3
Carefully pour the fertilizer from the Bettix bottle into the Infuser Tube.

Step 4
Connect the Infuser Tube to a ¾” garden hose thread water source and turn the water on.

Step 5
Turn the Shut-Off Valve in the ON Position to infuse the fertilizer into the Watering Machine.
